eLearning Plus

LearnHOST - a mobile friendly platform that is flexible, functional and cost effective

Flexible – Extendable - Individual

AVAILABLE IN WEEKS RATHER THAN MONTHS.

A WordPress based LMS that opens the door to a huge set of integrations and development possibilities to become a powerful and flexible Learning Centre.

LearnHost provides key insights to learner activity with the ability to drill down and explore learner progress.

LearnHOST gives learners access to online learning courses and provides the ability to control access to learning content as well as assess how learners are performing.

LearnHOST is a fast and flexible way of delivering your elearning courses to your team:

- It's quick, easy and affordable to get up and running
- It's compatible with mobile devices and responsive online learning
- It's cloud-based so learners can access training wherever they are
- Branding can be customised
- It tracks learner progress through the training and monitors performance
- It can output data for HR systems and provides reports
- Even if you have an existing LMS, LearnHOST can work within your organisation – offering more than just a LMS – a true learning environment.

LearnHOST

A powerful Learning Management Systems that provides an effective way to manage learners and learning content, handle course registrations, tracking and reporting. It also makes it easy to organise users, courses, lessons, quizzes, and issue certificates.

LearnHOST delivers a cloud-based architecture, providing scalability and performance for your learners with a modern, mobile friendly LMS that supports the xAPI standard.

SUPPORTS A WIDE RANGE OF CONTENT TYPES:

Text, images, tables, video, audio, quizzes, Captivate, Storyline, iSpring, H5P, RISE

The LearnHOST Platform means you don't need to worry about creating or managing your own LMS system – and once branded – you have a LMS platform that reflects your organisation's identity too. It's a pay annually, all inclusive solution that includes software, hosting, email support and maintenance. With no software to install internally, and a one time set-up/branding charge, you can be up and running quickly and with minimal fuss. Traditional, rigid LMS solutions are on the decline and flexible LMS solutions are on the rise. LearnHOST is a powerful learning platform that can integrate your corporate web presence, learning management system, eCommerce system, and marketing tools into a single, easy-to-use and fully supported platform.

Training & Support

We provide both advanced administrator training and course creator training and provide the level of support that is appropriate to your organisation.

WHY NOT ASK US FOR A DEMO OF LEARNHOST, YOUR VERY OWN LMS PLATFORM?

MULTI DEVICE LEARNING

LearnHOST provides an easy to use interface delivered via a web browser. Learners can access their courses from desktop, laptop, tablet or smartphone.

SUPPLY CHAIN LEARNING

With its ability to set up groups and assign group access to various learning content, you can now support important users outside of your organisation such as suppliers, distributors and customers.

REPORTING

You can track course completion time, manage enrolment by code into courses and groups, send certificates by email, track continuing education (CEU/CPD credits) and so much more. Our platform opens up entirely new options for learner engagement and tracking.

EXTENDING YOUR LEARNING ENVIRONMENT

Contact us to chat through how we can extend your LMS platform by enabling a variety of functionality options to suit your specific needs:

- eCommerce - sell your elearning courses
- CRM – manage users through integration with your chosen CRM.
- Events – set up live events, sell tickets and track attendance.
- Forums – provide discussion boards for your learners to share experiences
- Assignments – extend learning by introducing assignments
- Gamification – introduce gamified content, leaderboards, points and achievement awards

You can even point your organisation's domain to your LearnHOST Platform and host your complete web presence - try that with other LMS systems.

LearnHost at a glance

- Create unlimited courses
- Track learner progress
- Assess your learners with quizzes
- Generate reports
- Incorporate gamification
- Issue certificates
- Control the look and feel of your platform
- Export your data
- Track how much time learners spend in each course.
- xAPI (Tin Can) support
- Responsive/mobile friendly

USERS – ORGANISATIONAL ROLES

- Admin – HR - L&D
- Instructor
- Manager
- Learner

USER MANAGEMENT

- Ability to add learners
- Course enrolment

Technical Notes

WHAT'S INCLUDED?

Everything related to the platform itself is included. That covers platform hosting, monthly maintenance, support, Content Delivery Network, SSL, proactive security monitoring, outgoing emails and more. Everything that's needed to deliver and support the platform is provided.

WHAT'S NOT INCLUDED?

Adding content to your platform is something you set up independently, as is setting up any third party services that we support but don't offer directly (e.g. payment gateways, CRM, etc.). Support for technical issues with your LearnHOST Platform is of course included, but support in other areas is not.

IS THE LEARNHOST PLATFORM RESPONSIVE/MOBILE FRIENDLY?

Absolutely. The platform itself is mobile friendly but you should consider the media you add to your platform.

BANDWIDTH USAGE

LearnHOST is best suited to small and mid-sized organisations with 20 to 5,000 learners. We recommend LearnHOST for platforms that expect fewer than 100 simultaneous learners, that require less than 25,000 transactional emails per month and that require less than about 200GB of bandwidth monthly. We can support larger platforms but we will need to talk about your platform first. Please contact us before purchase or when you start exceeding these thresholds so that we can discuss your options.

VIDEO HOSTING

We do not serve videos directly from LearnHOST. LearnHOST natively supports videos hosted on YouTube, Vimeo and Wistia. We strongly recommend that you use one of those 3 services for delivering your video. As long as you do, serving videos is as simple as dropping the URL into LearnHOST .

EMAIL

We do not provide support for incoming emails or your own email accounts.
